

barrier heights from forward current-voltage characteristics
Bo Wang

Th-P.163 Temperature dependent nonlinear Hall effect in macroscopic Si-MOS antidot array
Alexander Kuntsevich

Th-P.164 Double-layer-gate architecture for GaAs quantum dots in the few hole regime
Oleh Klochan

Th-P.165 Conductivity and electron mobility of 2D massless Dirac fermions in HgTe quantum well
Alena Dobretcova

Th-P.166 Quantum phase transition in an interacting one-dimensional quantum wire
Abolfazl Bayat

Quantum Hall effects

Th-P.167 Quantum Hall effect in HgCdTe/HgTe heterostructures with inverted band spectrum: From quantum tunneling to classical percolation
Svetlana Gudina

Th-P.168 Anomalous bias-dependence of the quasiparticle tunneling conductance in the $\nu=1/3$ state
Szymon Hennel

Th-P.169 MIRO-like oscillations of magnetoresistivity in GaAs Heterostructures induced by THz radiation
Tobias Herrmann

Th-P.170 Quantum Hall double layer's behavior at Landau level filling $1/2 + 3/2$
XingJun Wu

Th-P.171 Quasiparticle tunneling and its scaling behavior in the fractional quantum Hall effect
Zixiang Hu

Th-P.172 Wigner function of a quantum Hall edge channel excited at GHz frequency
Arthur Marguerite

Spintronics and spin phenomena

Th-P.173 Direct observation of spin polarization in GaAs quantum wires by transverse electron focusing
Chengyu Yan

Th-P.174 Mass inversion in graphene by proximity to dichalcogenide monolayer
Abdulrhman Alsharari

Th-P.175 μ SR investigation of a new diluted magnetic semiconductor Li(Zn,Mn,Cu)As with Mn and Cu codoping at the same Zn sites
Shengli Guo

Th-P.176 Two-dimensional magnetic correlations and partial long-range order in geometrically frustrated semiconductor CaOFeS
Shifeng Jin

Th-P.177 Long range supercurrent in ferromagnetic semiconductor (In,Fe)As
Taketomo Nakamura

Th-P.178 Spin transport in multi-terminal Aharonov-Casher ring with quantum dot
Taku Matsunaga

Th-P.179 Spin relaxation dynamics of holes in GaAs quantum wells
Tianshu Lai

Th-P.180 Large anisotropy of electron and hole g factors in InAs/InAlGaAs selfassembled quantum dots emitting at telecom wavelengths
Vasilii Belykh

Th-P.181 Interactions in Rashba & Dresselhaus spin-orbit coupled semiconductors
Weizhe Liu

Th-P.182 Tuning the metal-insulator phase transition in (Ga,Mn)As by organic molecules
Xiaolei Wang

Th-P.183 Engineering giant magnetic anisotropy of ultra-thin Fe film supported by non-noble metal thin film
Xiaoxuan Ma

Th-P.184 Magnetic memory- magnetic logic integrated device by coupling semiconductor
